

## EU hiding 17 secret Gaza documents into infrastructure projects

### Description

default watermark

gaza

The [European Commission](#) has [claimed](#) there is “no public interest” in releasing seventeen reports on infrastructure projects the EU has funded in Gaza.

The reports would be likely to confirm Israel’s [wholesale destruction](#) of basic civilian infrastructure and pressure the EU to end its [continued collaboration with, and privileging of, the colony](#). It would also further strain the EU’s stubborn refusal to acknowledge Israel’s genocide in Gaza.

## Gaza: EU dodging genocide

On the same day, a United Nations inquiry formally confirmed that Israel continues to commit genocide in Gaza by deliberately murdering Palestinian children. The EU [boasts](#) that projects it funds in Gaza help mitigate harm to Palestinian children during the “conflict”. The “conflict” is a genocide estimated to have killed around half a million children and maimed many more.

The EU has [funded](#) extensive water and sanitation works in Gaza. Water and sanitation have been primary targets for the colonisers as they try to make Gaza uninhabitable for its native population. It also [claims](#) to have shipped “thousands of tonnes” of aid “to the region”. However, little or none of this aid has been allowed to pass Israel’s starvation blockade. Instead, IOF soldiers [guard racist settlers as they destroy aid and attack drivers](#)

The refusal to release its own reports on the outcomes of the projects it funds is a further EU collaboration in genocide.
