

Graphic footage warning: Israel slaughters families in Eid journalist assassination strike

Description

default watermark

Gaza

The occupation slaughtered families as it [bombed](#) at least one residential building in Gaza City trying to murder a journalist last night, 27 May 2026. Israel perpetrated the attack as Muslim families marked [Eid al-Adha](#) one of Islam's two main annual festivals. The colonisers also [murdered](#) civilians in Lebanon.

Warning - disturbing footage. One video is attached directly as Meta has disabled embedding.

Omar al-Gedi entered the building as it burned after the night-time airstrike. He filmed hideously-wounded victims being removed as fire-fighters tried to extinguish the flames:

He also captured a rescue worker carrying a dead child from the ruins of the building, with partially-severed limbs dangling. The footage is not blurred, to convey the true horror:

Israel appears to have been an attempt to kill another Palestinian journalist Eyad Azaam. The attack missed him but killed his young daughter â?? another added to the [more than 700 journalistsâ?? family members murdered](#) by the colonisers:

Gaza nights of murder

Local reports [indicate](#) that at least two other children were beheaded and one was burned to death in the blaze. The attack marked the second night of Israel bombing Gaza during the Eid festival, a clear show of contempt for Palestinians, Islam and humanity. Again children were the victims:

UK media parroted Israeli propaganda about "targeting terrorists". Even if it were true, it would not excuse the crimes but the "journalists" never point this out:

Israel is a terror state. UK media and government are its enablers.
