

IDF issues ANOTHER displacement order in south Lebanon

Description

default watermark

Israel strikes 38 villages in Lebanon earlier in May. (17 May 2026) the IDF issued evacuation orders.

The settler-colonial state of Israel has issued a new displacement order in south Lebanon, following a [day of heavy airstrikes and artillery](#). IDF Arabic spokesperson Col. Avichay Adraae [posted](#) on X:

In light of the terrorist Hezbollah party's violation of the ceasefire agreement, the Defense Army is compelled to act against it forcefully. The Defense Army does not intend to harm you.

The Lebanese citizens under bombardment might beg to differ.

Adraae [added](#)

To ensure your safety, you must evacuate your homes immediately and move away from the villages and towns by a distance of at least 1000 meters to open areas. Anyone present near Hezbollah elements, their facilities, and combat means exposes their life to danger!

IDF evacuation orders, Israel's colonial ambitions

As the *Canary* [reported](#) this week:

Israel launched an intense bombardment across southern Lebanon on the eve of Eid. Over 100 airstrikes were accompanied by ferocious artillery bombardments across the south and in Bekaa. Targets included a Palestinian refugee camp. Multiple people were killed.

And the *Cradle* reported that the evacuation order included the ancient city of Tyre.

BREAKING | Israel issues forced displacement orders for the city of Tyre in south Lebanon and surrounding Palestinian refugee camps and neighborhoods ahead of further intensified attacks, ordering residents to flee north of the Zahrani River immediately.

â?? The Cradle (@TheCradleMedia) [May 27, 2026](#)

Lebanese media said the order also included the city of Nabatieh.

 [#WarinLebanon](#) | The Israeli army has issued new evacuation orders for the entire city of Nabatieh, one of the main cities in south Lebanon, just a day after issuing such an order for the first time.

â?? L'Orient Today (@lorienttoday) [May 27, 2026](#)

The renewed assault comes as the US and Iran appear to be finalising a peace deal. Israelis [reportedly](#) fear that they have lost influence in Washington.

The officials are now said to fear that a US-Iran agreement could place restrictions on Israel's future military operations in Lebanon and Gaza.

The *Canary* likes to give context unlike the legacy media.

Israel [violated](#) the US-brokered Lebanon 2024 â??ceasefireâ?? more than 15,400 times since it was signed. That must be a world record.

Yet a short salvo from Hezbollah in March this year was framed as a signal outrage by [legacy media](#). That attack has been cited by the settler-colonial state as a pretext to invade.

Not satisfied with pulling the US and its allies into a runaway war with Iran, Israeli troops have pushed into Lebanon with airstrikes pummeling the capital Beirut.

The *Canary* reported the early moments of the new war. You can also [read about the secretive Israel-US â??side letterâ?? pact](#), which gave Israel carte blanche to keep bombing through the ceasefire, and our coverage of Israel's regular [breaches of the ceasefire](#).

Israel's longstanding colonial ambitions in south Lebanon, which they consider their own, have little to do with â??defenceâ??. And the people paying the price for those ambitions are the Lebanese people.
