Israel

Israel has succeeded â?? at least for now â?? in its [openly-admitted aim of collapsing peace talks](#) between the US and Iran. Iranian negotiators said they would not attend talks in Geneva after Israel [murdered dozens of people in airstrikes](#) in Lebanon â?? so US vice-president JD Vance has [also cancelled](#)

According to Israeli claims, the occupation was retaliating for the destruction of an IOF tank which was busy invading southern Lebanon and the killing of its crew. If the Israelis donâ??t want their tanks destroyed, they should maybe pull them out of Lebanon.

Israel â?? Gaslighting

In a typical gaslighting move after the attack, Israel then [claimed](#) it had agreed a ceasefire with the Lebanese resistance. Since the occupation has never honoured a ceasefire, this is clearly an attempt at psy-ops.

The occupation then said that in the â??ceasefire agreementâ?? they have the right to carry out ethnic cleansing in an area up to [10km north of the border](#) If the Lebanese resistance fires at the invaders it would be breaking the ceasefire.

Trump has [shown some signs](#) of tiring of Israelâ??s arrogance and provocation. Nobody would trust Trump either, but if he is remotely interested in averting a global economic meltdown and [more military humiliation for himself and Israel](#), he needs to slap Israel down, hard, for this murderous nonsense.
