In an international action, [Palestine Action](#) Global targeted multiple sites of [transport company DSV](#). The sites were covered in symbolic blood-red paint, with graffiti highlighting DSV's role in assisting genocide. Numerous windows were also smashed, and DSV vehicles were put out of action.

Over the weekend (Friday 22 May – Monday 25 May), actions took place against the logistics firm, in the US, Germany and at two sites in France.

In a previous coordinated action on 31 March 2026, Palestine Action Global had targeted DSV in several countries, including in the US and across Europe.

The Danish-owned international transport and logistics company has been transporting weapons, and weapons components, for [Elbit Systems, Israel's biggest arms manufacturer](#). As a result, actionists across the world have repeatedly targeted it.

DSV took over the Elbit job after another shipping company, Kuehne + Nagel, one of the only six companies licensed to transport and handle weapons in Britain, was forced to cut ties with Elbit in 2024 following a series of actions by Palestine Action and broader public pressure.

[Elbit produces 85% of the Israeli military's killer drone fleet, and land-based equipment](#) Its weapons, which it boasts are "battle-tested" on Palestinians, have been used throughout the ongoing genocide in Gaza, in the Palestinian West Bank, against Syria and Yemen, and currently against Lebanon and Iran. Elbit's drones have also been used to [attack international aid flotillas](#) in international waters.

A spokesperson for Palestine Action Global said:

Elbit Systems are only able to transport their weapons because of ruthless, amoral companies like DSV, who play a key role in the genocide in Gaza, and assist in killing people throughout West Asia.

By targeting them, we will disrupt the transport of Israeli weapons, and cost both Elbit and DSV money. It is not a matter of IF DSV will drop Elbit, but WHEN, because we will visit their sites again and again, until they stop facilitating genocide.
